

# Review the solution to convert Fahrenheit to Celsius

3 minutes

The following code is one possible solution for the challenge from the previous unit:

C#

```
int fahrenheit = 94;  
decimal celsius = (fahrenheit - 32m) * (5m / 9m);  
Console.WriteLine("The temperature is " + celsius + " Celsius.");
```

This code is "*one possible solution*" among many possible solutions.

If you were successful, congratulations! Continue to the knowledge check in the next unit.

## Important

If you had trouble completing this challenge, maybe you should review the previous units before you continue on.
